-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

23.

Art Unit: 3744

1. Claims 5, 8, 9, 12, and 18-20 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on August 11, 2009.

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-5, 10, 11, and 13-15 are rejected under 35 U.S.C. 102(b) as being anticipated by U.S. Patent No. 4,010,378 to Tharpe et al. Tharpe et al discloses the claimed invention of an internal combustion engine 10 driving an expander 26 through waste heat, a refrigerating cycle including a compressor 60 which is driven by either the expander 26 or a power transmitting device 46.

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 7, 16, and 17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Tharpe et al in view of U.S. Patent Application Publication No. 2003/0079484 to Matsuoka. Tharpe et al discloses the claimed invention except for the motor/generator. Matsuoka teaches a refrigeration system that is driven by a vehicle engine 3 and also by a motor/generator 5. Thus, it would be obvious to substitute, for the motor 46 of

Art Unit: 3744

Tharpe et al, a motor/generator of the type taught in Matsuoka, to yield the predictable result of generating electricity when not being used as a motor.

6. Claims 21-22 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
